Why Typst + Scripst?

Write lightly. Typeset professionally. Keep your tools at the speed of thought.

01 Light like Markdown

Readable markup for headings, lists, and emphasis.

02 Typesets like LaTeX

Equations, references, and pages for formal work.

03 Instant feedback

Incremental compilation keeps every edit immediate.

04 Modern packages

Pin versions in source; fetch and cache packages on demand.

SCRIPST ADDS THE SYSTEM

A mature toolkit for academic writing in Typst.

Layout presets

Articles, reports, and books, ready to use.

Parameters

Tune fonts, spacing, outlines, and links.

Content blocks

Definitions, theorems, problems, and solutions.

Ratchet

Consistent numbering, resets, and references.

FORMULA LANGUAGE

LaTeX

```
\langle A\rangle_\psi=\int \psi^*(x)\hat A\psi(x)\,\mathrm{d}x
```

Typst

```
braket(Psi, hat(A), Psi) = integral Psi^*(x) hat(A) Psi(x) dif x
```

$$\left\langle \Psi \middle| \hat{A} \middle| \Psi \right\rangle = \int \Psi^*(x) \hat{A} \Psi(x) \, \mathrm{d}x$$

CLASSROOM NOTE TEST

“Write and preview fast enough to keep up with class.”

Less boilerplate keeps your attention on the mathematics.
